1. **Introduction**
 The purpose of this study is to investigate the effects of a new educational program on student performance. The program is designed to improve critical thinking and problem-solving skills through a series of interactive activities and projects.

2. **Methodology**
 The study was conducted using a quasi-experimental design. A group of 50 students was selected from a local high school and divided into two groups: an experimental group and a control group. The experimental group participated in the new program, while the control group followed the standard curriculum. Data was collected through pre-tests, post-tests, and student self-reports.

3. **Results**
 The results of the study show a significant improvement in the performance of the experimental group compared to the control group. Specifically, the experimental group scored higher on the post-test and reported higher levels of engagement and confidence in their abilities.

4. **Conclusion**
 The findings of this study suggest that the new educational program is effective in enhancing student performance. The program's focus on interactive learning and critical thinking appears to be a key factor in its success.

12/15/2020 10:00 AM

Attest:

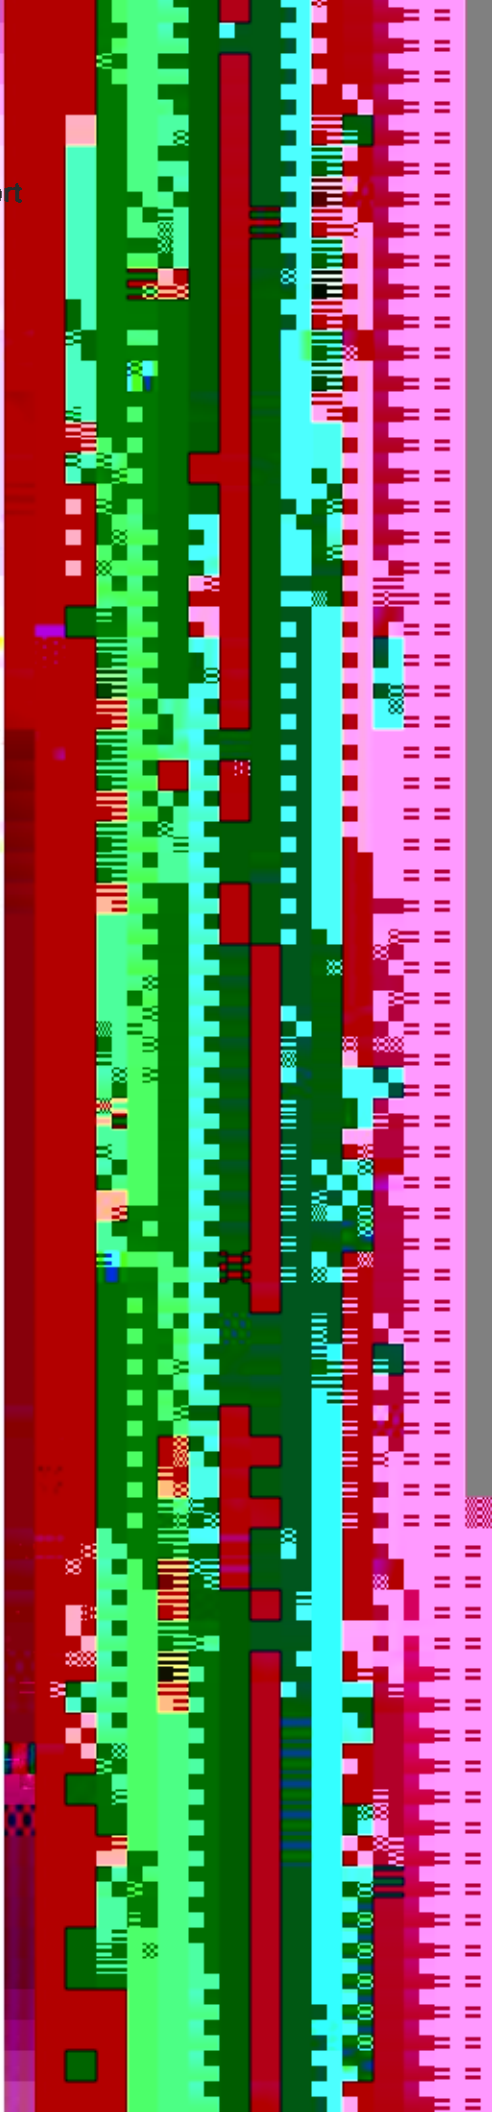

Chris Hune, President

1. The first section of the report discusses the background and context of the project. It outlines the objectives and the scope of the study, providing a clear understanding of the goals and the areas to be explored.

2. The second section details the methodology used for data collection and analysis. It describes the various techniques and tools employed to ensure the accuracy and reliability of the findings.

3. The third section presents the results of the study, highlighting the key findings and trends. It includes a detailed analysis of the data, supported by relevant statistics and visual representations.

4. The final section discusses the implications of the findings and offers recommendations for future research and practice. It emphasizes the practical applications of the study and the potential for further exploration in this field.

The schedule for February is on the door behind the desk in the Visitor's Center. I will work on the one for March the week starting on February 14th so if you have any vacation plans for Feb or March, please let me know.

**Finally, thank you so very much for your commitment to the VC.
Again, my phone numbers are 614-205-3733 if you need to call me.**

To: Members, Parks, Public Spaces, and Community Events Committee
